GENERAL INFORMATION

SUPER-MICRO MIX is a liquid formulation of essential plant nutrients and micronutrients that aids in the prevention and correction of micronutrient deficiencies, especially in higher pH soils where trace elements often become unavailable to the plant.

DIRECTIONS FOR USE

SUPER-MICRO MIX will disperse in water with minimal agitation. It can be tank mixed with most pesticides and fertilizers except high phosphate materials. Always make a small-scale test to assure compatibility. Follow the mixing sequence: 1. Water; 2. SUPER-MICRO MIX; 3. Other fertilizer; 4. Pesticide. Use of a non-ionic surfactant is recommended for optimal leaf absorption.
